

Trusted marine support

 **Acta Marine**

Acta Marine

Delivering excellent marine support

First and foremost, as a family-owned business, we are focused on the long-term. We build strong relationships with our clients. Safety and quality are the key principles of how we work. Therefore we continually invest in the welfare and training of our personnel as well as upgrading and maintaining our fleet.

Established in 1970, Acta Marine is backed up by more than 40 years of experience and a diverse fleet of over 40 vessels. At the core of the company is a team of 250 committed and reliable professionals. Their dedication and expertise is called upon every day; and it is their passion that makes Acta Marine a company with clear goals for the future.

Mission

We deliver excellent marine support for the coastal infrastructure and offshore energy markets. We work together as a team in an environment of trust, built on safety and expertise. Striving for sustainable profitability, we continuously adapt and improve our services and we are ready to take on the most challenging projects.

Acta Marine's Core Values:

Collaborate - Accountable - Reliable - Expertise

As a family owned-company with long-term focus, we take **CARE** of all aspects of our business; our clients, business partners, our people, our assets, and the environment we work in.

Markets & Services

Acta Marine has extensive experience operating in coastal and offshore waters with a large versatile fleet. Based on our solid track record and diverse marine experience, we are committed to offer our clients the best and most effective solutions.

We build on our experience in coastal and offshore waters and continuously look for the best solutions and innovations that fit our clients' needs. Utilizing our knowledge and expertise, we are eager to explore new markets.

While our vessels are adaptable and capable enough to tackle a variety of jobs, our core business is spread over two main areas:

Coastal Infrastructure

Offshore Energy

Looking to maximise profitability? Our versatile fleet and onshore support teams help your projects run like clockwork.

Offshore Energy

Offshore Wind

Our vessels can service the whole lifetime of offshore wind farms. This includes comfortable offshore accommodation, cargo transport and storage, and walk-to-work capacity.

- Preparation and survey (geotechnical and UXO investigations)
- Construction, installation and O&M
- Crew transfers and wind farm support
- Cable and pipeline burial support

Oil & Gas

Our track record for the oil & gas sector includes work in the North Sea, Middle East, Africa, Central America and the Caspian Sea. Whether you need offshore or shallow water expertise, our diverse fleet can be mobilised for a wide range of duties.

- SPM and FSO support
- Pipeline construction support
- Offshore oil exploration
- Shallow water supply, support and crew transfer
- Decommissioning support

We use our experience to deliver excellent Winter Workability. After all, maximizing uptime is the key to your success.

Coastal Infrastructure

Whether it is for housing, trade or food – coastal infrastructure developments play a key role in addressing the challenges of our changing world. Acta Marine's fleet delivers tailor-made support for dredging, land reclamation, coastal defence, port construction and aquaculture projects.

A single vessel or multiple vessels for a combination of duties; we have the right workboats for the right project, all with fully trained crews.

- Multicats
- Tugs, Shoalbusters
- Survey Vessels
- Crew Transfer Vessels

Shallow draft

Most of these vessels have an operational draft of less than two meters: a valuable characteristic for coastal and shallow water projects. Deck cranes, anchor handling systems, hydraulic packs and generators: our vessels have all the right equipment for the most challenging jobs. Furthermore, our expert crews have the all-important experience to carry out the job reliably and securely.

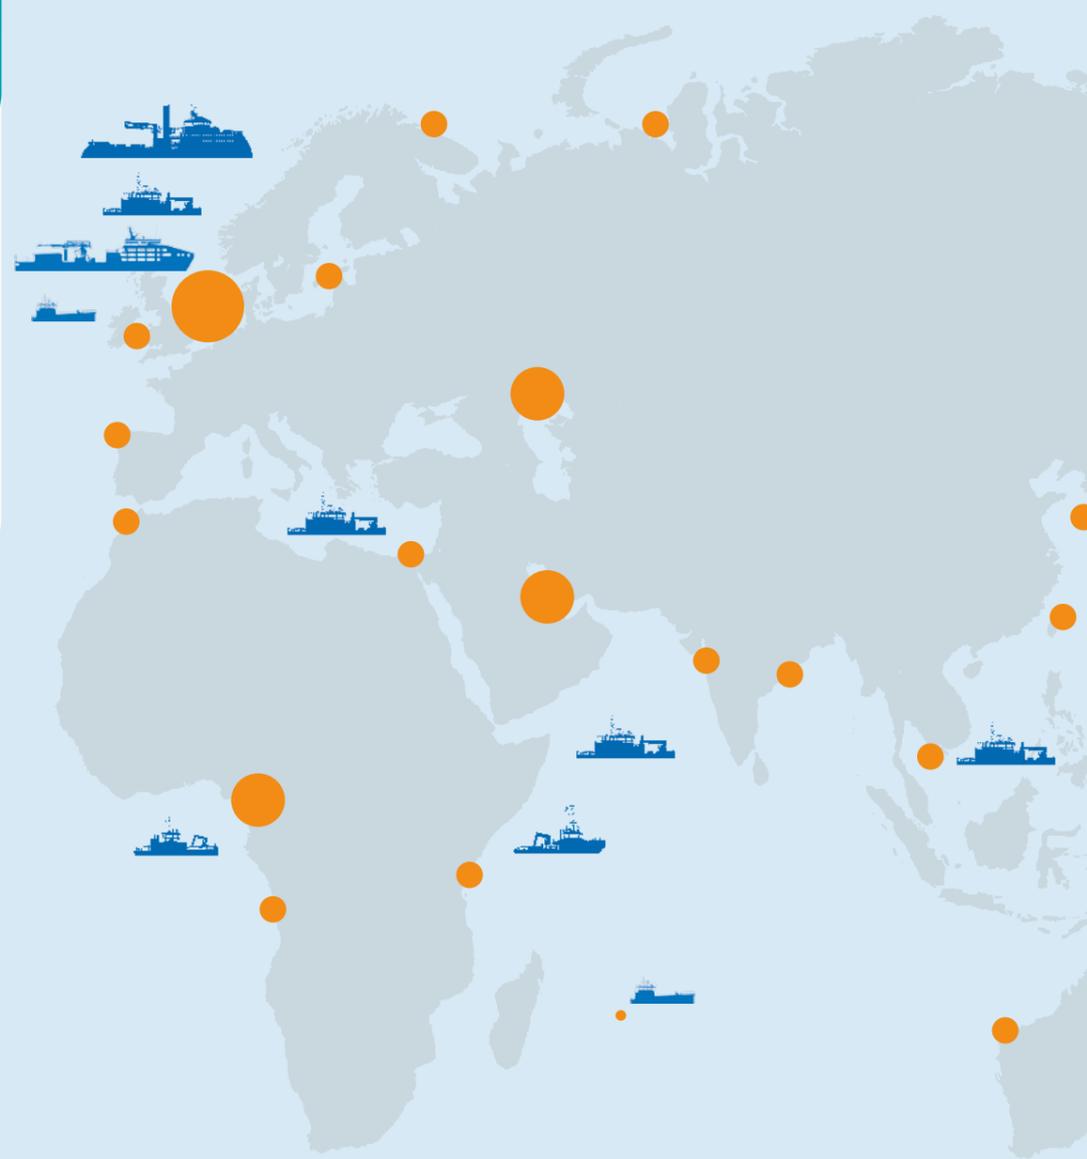

Offering customised worldwide solutions – we operate the largest number of shallow draft workboats on a global scale.

Global reach

Through long-term relationships with clients and business partners, we cooperate in a transparent way. With a service-oriented focus, we take care of our clients' needs and requirements. As well as our core markets in Europe, Africa and the Middle East, we have the expertise and the organisational skills to take on jobs all over the world. From dredging support contracts in Taiwan to engineering projects in Chile – you name it, we can make it work.

Wherever we work, we believe in building local partnerships to create customised solutions. It is these strong relationships that have helped us grow into a truly global business.

QHSSE

Quality, Health, Safety, Security and Environment.

We believe that the Health, Safety and Security of our employees, clients and other stakeholders and protection of the Environment is top priority.

With proper training, focus and dedication, we can manage any risk associated with our operations and reach our goal for zero accidents and zero injuries. We will comply with laws and regulations and set and maintain our Integrated Management System to the highest level in industry.

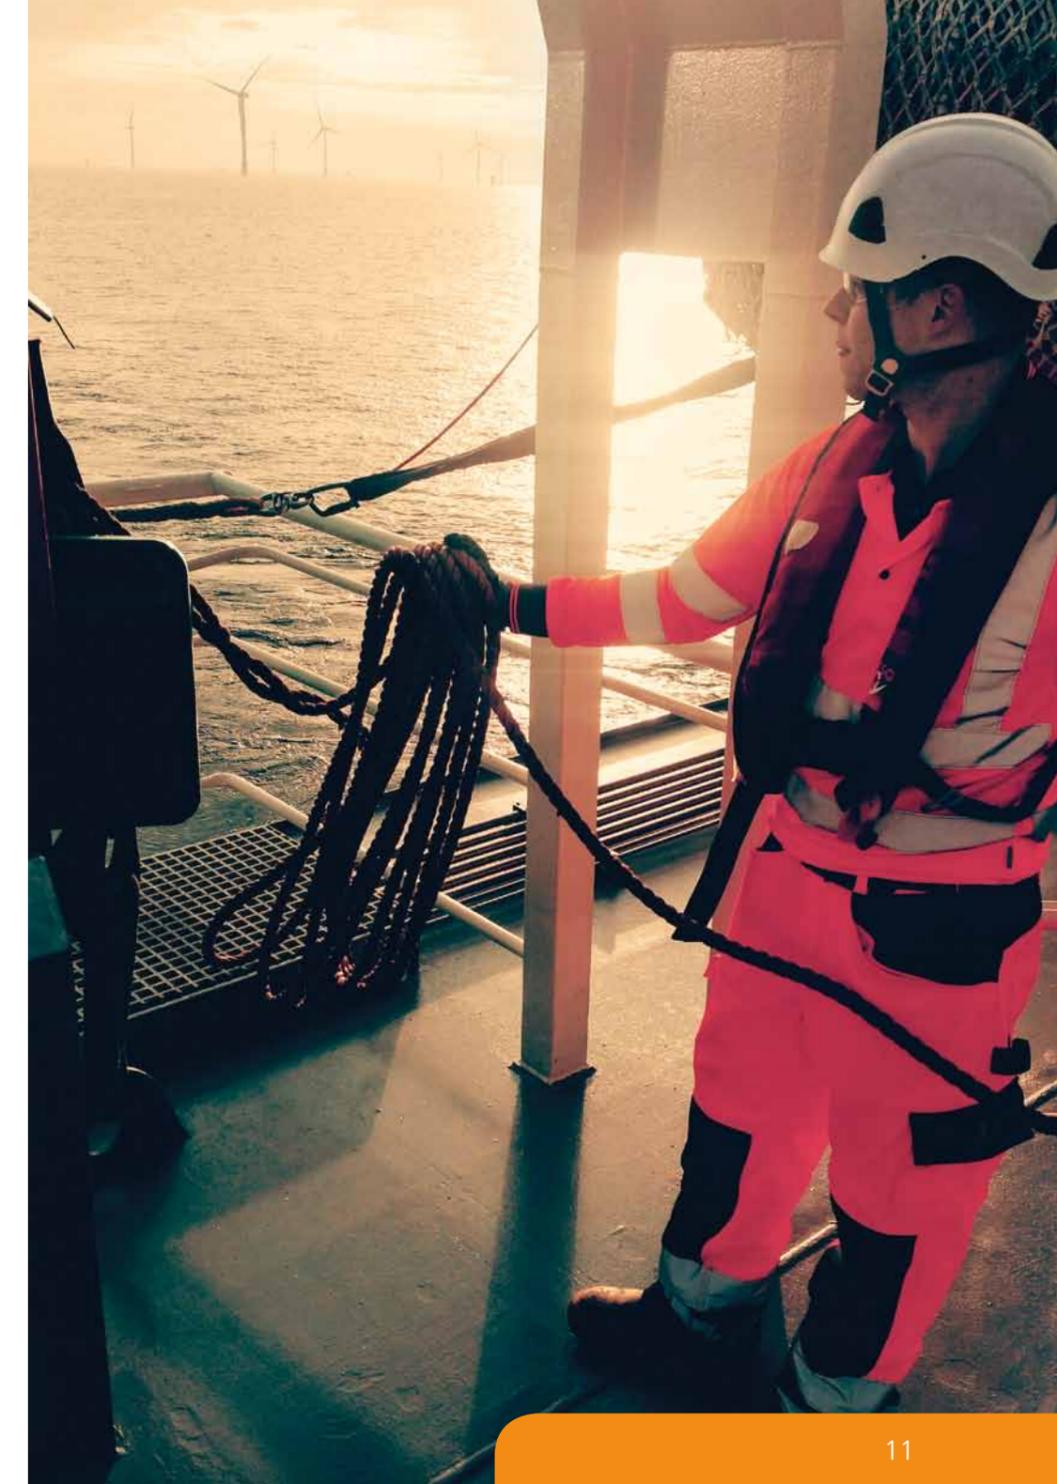

Acta Marine is certified to ISO 9001:2008, Dutch VCA** and ISM Code.

People

Committed and competent.

We operate in a safe and responsible manner and take ownership over our actions and behaviour, and show our respect for other people. Whether on land or at sea, you will find highly motivated and qualified people at Acta Marine.

We are proud of our people – they have earned us our reputation as a professional and reliable maritime service provider.
